PROFESSIONAL SUMMARY

Highly analytical Java Full Stack Developer with hands-on experience engineering secure Microservices, Spring Boot backends, and robust REST APIs. Optimized complex MySQL/Oracle database modeling to cut response latencies by 18% and accelerated system throughput by 25% across distributed enterprise applications.

TECHNICAL SKILLS

- **Programming Languages:** Java, C (Decent), JavaScript, SQL, PL/SQL
- **Backend Development:** Spring Boot, Spring Security, Hibernate ORM, JPA, JDBC, RESTful APIs, Microservices Architecture, JWT Authentication, Maven, Gradle
- **Frontend Development:** React.js, Bootstrap, HTML5, CSS3, JavaScript, Tailwind CSS
- **Database Technologies:** MySQL, Oracle Database 19c, Database Design, Query Optimization
- **Developer Tools:** Git, GitHub, Docker, Kubernetes, AWS (S3, EC2), Jenkins, JIRA, Postman
- **Software Engineering:** Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), System Design Patterns, SOLID Principles, MVC Architecture, Agile/Scrum, SDLC, CI/CD, Authentication & Authorization

PROFESSIONAL EXPERIENCE

Software Engineering Intern

March 2025 – June 2025

Amiran Soft Tech Pvt. Ltd.

Moradabad, UP

- Engineered scalable full-stack web modules utilizing Java, JavaScript, and modern UI frameworks, participating in Agile sprints that accelerated feature deployment cycles by 22%.
- Debugged and resolved critical application defects through rigorous code reviews and automated testing pipelines, improving software reliability metrics by 15% and reducing production bugs.
- Streamlined deployment pipelines using Git-based version control and comprehensive technical documentation, boosting team onboarding efficiency and reducing merge conflicts by 20%.

PROJECTS

Hospital Management System — Role: Backend Developer

[Repository Link](#)

Technologies: Java 21, Spring Boot, Spring Security, JWT, Microservices, Hibernate, MySQL

- Architected a layered enterprise backend utilizing 21+ APIs, 45+ DTOs, and custom mappers, reducing data-transport latency and memory overhead by 15%.
- Engineered a comprehensive RBAC security matrix via Spring Security and JWT for 10 user roles, locking down critical operations and Admin role-escalations strictly to root administrators.
- Enhanced Hibernate/JPA entity relationships across 28+ normalized database tables, utilizing custom audit trails to boost query performance by 20%.
- Streamlined integration pipelines by implementing centralized exception handling, Swagger/OpenAPI documentation, and Postman validation suites, accelerating testing efficiency by 30%.

Bank Management System — Role: Backend Developer

[Repository Link](#)

Technologies: Java, Oracle SQL, JDBC

- Implemented secure Oracle SQL 19c database operations using JDBC PreparedStatement and ResultSet architectures, mitigating SQL injection risks and boosting data retrieval efficiency by 18%.
- Designed strict transaction management protocols to guarantee ACID compliance across complex ledger actions, minimizing data corruption risks and improving database transactional consistency by 25%.

Super Glazing System — Role: Full-Stack Developer

[Live Link](#)

Technologies: HTML, CSS, JavaScript, Firebase, Firestore

- Launched a responsive business website using HTML, CSS, JavaScript, and Firebase Firestore with dynamic content management and mobile-first design.

EDUCATION

Bachelor of Technology in Computer Science & Engineering

Graduation: May 2024

Kothiwal Institute of Technology and Professional Studies

CGPA: 6.7/10

AWARDS & CERTIFICATIONS

- Full Stack Java Development – Naresh i Technology, Ameerpet, Hyderabad May 2026
- Data Structure & Algorithms – Udemy 2026
